Hi Cheryl,

Here's a presentation I did for the Water Quality Standards Academy in Alaska some time ago. You might get some ideas from it.

Subject: draft materials

---

Hi Lon,

Am attaching the beginnings of a draft presentation on risk as well as the RSC draft I already sent you. If you have time to look at them – especially the draft presentation - that would be good.

I discussed the origins of 10-6 in what I think is a pretty impartial approach – that is my goal. Presentation will change and grow as I work more on it – whole sections on the criteria are not written yet.

Tried to make a very simple description of the linear low dose approach – please see if it looks correct. Will also draw a simple picture to accompany it. Just trying to get a simple description to provide a concept that our interested parties can think about and understand – they will not need all the details and if they want them we can provide additional references they can check out themselves.

Thanks for your help.

Cheryl
